Election/Restrictions

1. Applicant's election of group I in the reply filed on Nov. 1st 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The abstract of the disclosure is objected to because on page 9 line 1, the term "molamine-modified" is a typographical error. Correction is required. See MPEP § 608.01(b).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,403,221. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are materially and structurally similar. Claim 1 of

6403221, the epoxy resin composition is the same as the presently claimed B layer. In claim 5 of 6403221, a supporting base film is disclosed in the specification as a polymeric resin film such as a polyimide, a release paper, or a metal foil such as copper foil (col 6 L 5-9). The present invention regards to a B layer that is roughenable and is placed adjacent to a heat-resistant resin layer, preferably a polyimide layer (P. 7 L 17), or the B layer is adjacent to a peelable support film (or a release paper), or the B layer is adjacent to a copper conductor layer.

5. Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,805,958. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are structurally and materially similar (see USPN 6,805,958 column 6, lines 10-15 & 28-35).
